The Stainless Steel Specialist Course

The BSSA Stainless Steel Specialist Course is a self-taught, self-paced correspondence course that sets an industry standard for knowledge of stainless steel. Providing comprehensive information about all aspects of stainless steel, the course not only offers a practical learning framework but is an ideal

Levels of certification

The course consists of 16 individual self-study modules with accompanying training notes. The BSSA offers two levels of certification:

Intermediate Certificate

An intermediate Certificate will be awarded for the successful completion of a minimum of five modules. Compulsory subjects make up four of the five titles. Typically, the intermediate Certificate can be completed in three months.

Full Certificate

A Full Certificate will be awarded for the successful completion of a minimum of twelve modules. Compulsory subjects make up seven of the twelve titles. Typically, the Full Certificate can be completed in six months.

Benefits

- A full understanding of stainless steel and its applications
- An authoritative reference document
- Flexibility to complete the course at own pace and in own time
- Improves the knowledge base of the organisation in this key area
- Suitable for people new to the industry and as a refresher course for the more experienced employee
- The modular form of the course gives the flexibility to tailor the training to suit the company's needs
- Provides an industry wide standard
- A recognised transferable qualification
- Raises the knowledge level and supports the longer term growth of the stainless steel market

	Title of Training Modules	Intermediate Certificate	Full Certificate		Title of Training Modules	Intermediate Certificate	Full Certificate
1	An Introduction to Stainless Steel	✓	✓	9	Machining Stainless Steel		
2	Stainless Steel vs Corrosion	✓	✓	10	Practical Considerations for Designing Stainless Steel		✓
3	The Mechanical Properties of Stainless Steel	✓	✓	11	Stainless Steel & Stainless Alloy Castings		
4	Surface Finishes on Stainless Steel		✓	12	Forging Stainless Steel		
5	Fabricating Corrosion Resisting and Stainless Steels			13	Stainless Steel Pipe & Tube		
6	The Cutting of Stainless Steel			14	Cold Forming Stainless Steel		
7	The Metallurgy of Stainless Steel	✓	✓	15	Deep Drawing Stainless Steel		
8	The Welding & Joining of Stainless Steel		✓	16	Stainless Steel & Stainless Steel Alloys at High Temperatures		

Stainless Steel Specialist Course

Application Form

To complete the **Intermediate Certificate**, you must undertake at least five Training Notes. The BSSA recommends that the four compulsory Training Notes ticked below be undertaken, as well as at least one Training Note of your choice.

To complete the **Full Certificate**, you must undertake at least twelve Training Notes. The BSSA recommends that the seven compulsory Training Notes ticked below be undertaken, as well as at least five Training Notes of your choice.

Titles of Training Notes	Intermediate Certificate (Tick at least 1 additional box)	Full Certificate (Tick at least 5 additional boxes)
An Introduction to Stainless Steel	✓	✓
Stainless Steel vs Corrosion	✓	✓
The Mechanical Properties of Stainless Steel	✓	✓
Surface Finishes on Stainless Steel		✓
Fabricating Corrosion Resisting and Stainless Steels		
The Cutting of Stainless Steels		
The Metallurgy of Stainless Steels	✓	✓
The Welding and Joining of Stainless Steels		✓
Machining Stainless Steels		
Practical Considerations for Designing in Stainless Steel		✓
Stainless Steel and Stainless Alloy Castings		
Forging Stainless Steels		
Stainless Steel Pipe and Tube		
Cold Forming Stainless Steels		
Deep Drawing of Stainless Steels		
Stainless Steel and Stainless Alloys at High Temperature		

You may wish to complete all 16 modules
