

#5 MISIF/NI/IMOA WEBINAR

The Welding And Weld Repair Of Stainless Steel And Nickel-Base Alloys Used In High Temperature Service by Mr William F. Newell, Jr., PE, PEng, IWE

SYNOPSIS

Welding and repair of stainless steel and nickel-base alloys used in high temperature service present many challenges. High temperature property requirements and service environment influence weld filler metal selection. Weld filler metal ferrite and use of fully austenitic welding materials contribute additional unique situations. Repairs and dissimilar welding also offer significant challenges. Each of these areas will be discussed and examples presented to illustrate and assist in resolving or preventing many welding related issues encountered in high temperature service.

ABOUT SPEAKER

Mr. William F. Newell, Jr., involved in welding engineering applications and consulting in the nuclear & fossil electric power and heavy industrial arenas for nearly 50 years, both domestic and internationally. Bill is a member on national and international code bodies, a Life Member and Counselor in the American Welding Society, and a member of AWS A5N, Chair of AWS D10 Piping and Tubing, a Member of ISAC and ISO/TC 44, International

- Committee on Welding and Allied Processes, plus a member of ASME Standards
- Committee IX – Welding and Brazing Qualifications, ASME Post Construction
- Issues – Subcommittee on Materials and Repair, former Chair of ASME SCII/IX Subgroup on Strength of Weldments, and a member on the ASME SCII Working Group on Creep Strength-Enhanced Ferritic Steels. He is the President of W. F. Newell & Associates, Inc., and Co-Founder/Vice President – Engineering of Euroweld, Ltd.

REGISTRATION FORM

Please register the following person/s for the “WEBINAR #5”.

PLEASE TYPE IN BLOCK LETTERS:-

1. Name: _____

Designation: _____

Email: _____

2. Name: _____

Designation: _____

Email: _____

Company Name: _____

Date:
8 September 2021
(Wednesday)

Time:
10.00 am – 11.30 am

COMPLIMENTARY

Organised and Supported by:

About MISIF

The Malaysian Iron & Steel Industry Federation (MISIF) is the national association representing the iron and steel manufacturing companies of Malaysia. Among its many activities, MISIF provides subsector group management and in this instance, this workshop is to support promotional activities of the MISIF Stainless Steel Group.

About NI

Nickel Institute (NI) is the global association of most of the world's primary nickel producers. The NI supports and grows markets for new and existing nickel applications which naturally includes stainless steel. NI also promotes good science, asset management and socioeconomic benefit as the basis for public policy and regulation.

About IMOA

The International Molybdenum Association (IMOA) is a nonprofit trade association, representing the majority of the molybdenum industry worldwide. IMOA promotes appropriate molybdenum use through education, publications and targeted research projects. It also seeks to ensure appropriate regulation of molybdenum and its compounds, based on sound science.

INTERNATIONAL MOLYBDENUM ASSOCIATION
THE VOICE OF THE MOLYBDENUM INDUSTRY
